### INTRODUCTION

This volume (R.I.P. 341) is one of a series of historical studies which will be devoted to an attempt to determine the accuracy and reliability of the operational intelligence, derived from enemy communications, which was furnished to submarine commanders operating under the Commander, Submarine Force, Pacific Fleet. It is hoped that correlation and interpretation of the source material available in the files of the Commander-in-Chief, Pacific Fleet and the United States Naval Communication Intelligence organization will produce valuable lessons for the future.

For the sake of convenience the year 1943 was selected as a beginning point for this series since it was an outstanding period in American submarine warfare in the Pacific. Furthermore, since the records for this period are more complete than those of 1941 and 1942, it was felt that a more accurate appraisal of the worth of communication intelligence could be made.

During this period all American submarines operating below the equator and east of

ORIGINAL  
29 November 1945

longitude 130° were under the command of Commander, Submarine Force, Southwest Pacific Fleet; all submarine operations above the equator and west of longitude 130° E were the direct responsibility of the Commander, Submarine Force, Pacific Fleet. The relationship of communication intelligence to the operations of submarines under the Commander, Submarine Force, Southwest Pacific Fleet, will be discussed in a different series, when research in the operational files of the command can be effected.

There were few activities during World War II which received so little attention as the campaign waged so successfully in the Pacific by the submarines of the United States Navy. Co-ordinated attacks by American submarines and air fleets from 1941 to 1945 resulted in the destruction of most of the Japanese merchant fleet, the crippling of Japanese industry by cutting off its source of supply, the hampering of Japanese Army and Navy movements, and the isolation of many Japanese garrisons. The destruction of over six million tons of merchant shipping meant that Japan could not

ORIGINAL

29 November 1945

effect its ambition of creating an East Asia Co-prosperity Sphere.

As for the part played by American submarines in the elimination of Japan as a military power, statistics indicate that the greater part of Japanese shipping was already destroyed when Allied amphibious forces seized the bases which made possible daily air strikes at Japanese home ports. Although there is no need to enter the current controversy as to whether or not the B-29's won the Japanese war, it suffices to say that the far reaching effects of United States submarine warfare in the Pacific cannot be overlooked by any objective observer. As of August 30, 1945, 1256 Japanese ships had been sunk by American submarines.

During the war submarine operational authorities were in constant communication by a direct telephone line with the United States Naval Communication Intelligence Organization, and the information made available to them was used to such good advantage that many targets, which otherwise might easily have slipped by the submarine patrols, were sent to the bottom of the sea. This

ORIGINAL

29 November 1945

does not mean that American submarines were not able to operate independently and efficiently on their own account. On some occasions, when the Japanese had changed their cipher systems and for a short period of time no information could be derived from their communications, American submarines sank almost as many, if not just as many, Japanese ships as when the Japanese messages were being read. Submarine operational authorities have pointed out, however, that the information made available when the Japanese cipher messages were being read currently was of great value in the carry over period till American naval cryptanalysts solved the new Japanese cipher systems. Analysis of previously deciphered messages supplied valuable data as to the favorite routes and procedures of Japanese merchant ships, and, thus, even when the flow of intelligence decreased temporarily American submarine commanders could be directed to productive areas.

Chart A shows the relationship between the number of Japanese messages translated by American naval cryptanalysts and the tonnage of sunken Japanese shipping.

Red Line - Tonnage sunk.  
Black Line - GZ Translation.

CHART A

ORIGINAL  
29 November 1945

Though United States submarines were not always able to sight targets reported to them by communication intelligence sources, submarine authorities have attributed much of their success to information derived from enemy communications. On April 14, 1945, the Commander, Submarine Force, Pacific Fleet, informed the Commander-in-Chief, Pacific Fleet, as follows:

...High percentage of submarine sinkings is based on ULTRA information ... (131237 NCR 1231).

On July 3, 1945, the Commander, Submarine Force, Pacific Fleet sent the following to the United States Naval Communication Intelligence Organization:

"Commander Submarine Force desires to express his admiration and appreciation to the officers of ComIntOrg for the splendid support and coverage given by you to the recent submarine operation in the Japan Sea. May the great success of this expedition repay you somewhat for your tireless efforts to strike this blow at the heart of the enemy's empire. It could not have been done without your help."

The use of communication intelligence helped revolutionize submarine strategy in the Pacific,

TOP SECRET ULTRA

TOP SECRET ULTRA  
R.I.P. 341

ORIGINAL  
26 November 1945

for operational authorities, because of the continuous flow of communication intelligence which they were receiving, were able to station submarines in certain areas which would not normally be considered productive targets. Though the routes of Japanese convoys were being constantly shifted to avoid reported American submarines, the messages announcing the change of course were deciphered and made available to American submarine commanders. Thus, many otherwise<sup>UN</sup> available targets were provided, torpedoes were expended profitably, long patrols in unproductive areas were avoided, and the morale of officers and men was improved.

This volume (Chapter II - R.I.P. 341) outlines the relationship of Communication Intelligence to American submarines operating in the Pacific during February, 1943. Subsequent volumes will continue the story. Each volume has an appendix which contains the following material source for each case discussed:

A. Source of Intelligence

Japanese messages deciphered and translated by the United States Naval Communication Intelligence Organization.

ORIGINAL  
29 November 1945

B. Operational Dispatch

A message containing the information derived from (A), sent by the Commander, Submarine Force, Pacific Fleet to American submarines.

C. Submarine Action Report

Pertinent data extracted from the action report of the submarine or submarines concerned.

Chart B summarizes the results of action taken by United States Submarines from January through October, 1943, as a result of Communication Intelligence. Another general summary of results will be made in the volumes dealing with November, 1943 to December, 1944.

A. Positive.....	<u>112</u>
B. Probable.....	<u>11</u>
C. Possible.....	<u>24</u>
111. Number of Potential Targets for which the Results Are Unknown.....	<u>11</u>

\* The number of potential targets in each Case is

TOP SECRET

TOP SECRET ULTRA  
R.I.P. 341

ORIGINAL  
15 January 1946

derived from the number in the ComSubPac Ultra dispatch. If, however, ComSubPac did not state the number but merely described the target as a convoy, the target is reckoned as one (an escort is not counted unless specified as a destroyer or a larger ship). But if the target was sighted, then the number named in the submarine patrol report is the number computed in the analysis. If ComSubPac was indefinite, stating the target to be "several" ships, the target, if not sighted, is counted as two. For example, in Case 41 of October (Chap. X, R.I.P. 347) ComSubPac described the target as "2 AUXILIARY CARRIERS SEVERAL DESTROYERS". The target, which was not sighted, was reckoned as four.

Thus the reckoning is often arbitrary and therefore the figures are only approximate. This applies also to the reasons given for the failure of a submarine to sight, or to attack, an Ultra target assigned to it. If none of the reasons listed in the analysis precisely cover a given case, the case is then reckoned under the most nearly equivalent reason. If two submarines are named as addressees, the reason reckoned in the analysis may be that of the first addressee (e.g., Case 23 of July-Chap. VII, R.I.P. 345) or it may be the reason of the majority if three or more submarines are action addressees (Case 47 of July).

6. 03-1745

U.S.S.  
Romano

Many ships including one carrier to enter North Pass at Truk at 0700 (UCT) on February 9, 1943.

ComSubPac dispatch received. The Romano set its course for the desired position at 0418 (K time) on February 9 or 1018 (UCT) on February 8 but due to the adverse current could not make the position in time. No ships were sighted.

7. 09-0841

U.S.S.  
Stinson

1 tanker, possibly the Fincken near Maning with small escort to depart from 09-45N, 167-35E at 2100 (UCT) on February 9 - heading northwest.

ComSubPac dispatch received. At 0700 (UCT) on February 9 the Stinson departed for Truk via Romago, although the tanker was not due to depart until 2100 (UCT). No search was made, therefore no contact.

8. 10-1011

U.S.S.  
Flying Fish

Shipping due to leave Sulphur for the Empiro, exact route unknown since shipping had been re-routed to the east of the Island chain due to the presence of the Flying Fish.

ComSubPac dispatch received. From February 10 through 13, the Flying Fish was patrolling west of the Marianas. The patrol was not effective and nothing was sighted, due possibly to limited horizon, and high seas which were encountered.

Enemy submarine to Hono  
be at a position  
10 miles east of  
Miyake Shima at  
2100(GCT) on Feb-  
ruary 11, 1943.

ComSubPac dispatch received.  
The Madock set its course for  
Midway at 1730 February 9. No  
search was made.

ComSubPac dispatch received.  
The Tarpon started back at OLC  
(1 time) through Islands to get  
in position to intercept the  
enemy submarine. On February  
12 the Tarpon submerged 10  
miles east of Miyake Shima. No  
contact was made.

9. 10-1212

U.S.S. Ranger

7 transports and  
several escort ves-  
sels sailed from AG,  
152E at 0800 on Feb-  
ruary 8. The ships  
are to arrive at 7M,  
134E at 2300(GCT) on  
February 14.

ComSubPac dispatch received.

The Ranger was patrolling the  
Palau area (7M, 134E) on Feb-  
ruary 13 and 14. On February  
13 a small patrol vessel was  
sighted and on February 14 at  
7-32N, 134-21E a vessel of the  
Macara class which was  
standing in Toagel Hlungul  
Passage was attacked at 0441  
(GCT) on February 14. The  
vessel was later identified as  
the Tokyo Maru (See II, Case  
16, A-2). Since the convoy  
was not due to enter Palau  
until 2300(GCT) the submarine

action report suggested that this torpedoing convinced the Japanese to reroute shipping through another passage.

10. 12-0253

U.S.S. Sunfish

None

ComSubPac dispatch received. The Sunfish cleared the Marcu Island area on February 12 and on February 14 conducted a surface patrol near Chichi Jima (231, 141E). At 1610 (GCT) February 16 the Sunfish made radar contact but lost it because of poor visibility and high seas and rain.

U.S.S. Flying Fish

Positive

ComSubPac dispatch received. On February 16 the submarine sighted a 6000 ton freighter with a surface escort on course 163 at 0444 (GCT). Four torpedoes were fired and the vessel was sunk with 2 hits at approximately 181, 145E.

U.S.S. Tunny

None

ComSubPac dispatch received. The Tunny was out of torpedoed and left the assigned area at 1730 (GCT) on February 11.

Stingray

U.S. Navy and one none

escort vessel to arrive at 6-55N, 150-45E

at 0300(GCT) on February 14 en route to

South Pass at Truk

ConsSubPac dispatch received. On February 14 the Stingray was patrolling south and west of Losap Island and south on a westerly course from South Island, Truk Atoll. At 2045 (GCT) on February 14 at position 07-02N, 150-45E, a small trawler was sighted. On February 15 through 20 the Stingray conducted a patrol west and southwest of Truk, and northwest of Truk between East Pagan and Rasmussen Island. No contact was made. ConsSubPac dispatch received. The U.S.R. Jarpen was searching for an enemy submarine on February 10 through 15 in the vicinity of Mikura Shima, Miyaka Shima, Kozu Shima and Manila. No contact was made with the convoy. See above for Stingray activity.

12. 13-0209

U.S.S.  
Boardfish

1 destroyer to be  
at 00-07N, 180E.  
No date-time given.

ComSubPac dispatch received.  
The Boardfish crossed the  
180th Meridian at 2032(GCT)  
on February 14. Nothing was  
sighted while the submarine  
was in this vicinity.

13. 13-2311

U.S.S.  
Pompano

1 merchantman (type None  
unknown) leaving  
Kwajalein for Galapagos  
at 0100(GCT) on Feb-  
ruary 15. Will have  
one escort as far as 161-  
30E and air coverage.  
Enemy submarine at  
0300(GCT) will pass  
through points indicated  
on the following days:  
12 February ~ 30N, 146-30E  
15 February ~ 18-10N,  
150-30E  
17 February 10-10N,  
153E and at 2200(GCT)  
will arrive at South  
Pass (Truk).  
Name us for Flying Fish

ComSubPac dispatch received.  
At 1850(GCT) on February 13,  
the Pompano submerged 70 mile  
southwest of Kwajalein. On  
February 15 at 10-14N, 162-34  
a ship was sighted but it was  
not the Ultra target.  
ComSubPac dispatch received.  
Although the submarine was  
reported west of the Bonin  
Islands, the Flying Fish on  
February 14 through 16 was  
patrolling in the Marianas  
Islands near Pagan Island.  
The enemy submarine was not  
sighted.

U.S.S.  
Albatross

ComSubPac dispatch received.  
The Albatross was patrolling  
near Truk on February 14  
through 20, not in this area.

14.	14-2342	U.S.S. <u>Pompano</u>	1 large tanker departed Jalut at 2000(GCT) on February 14 en route to Kwajalein.	None Made with Target (H)	ComSubPac dispatch received. Only a small vessel under 500 tons was sighted by the <u>Pompano</u> on February 15.
-----	---------	-----------------------	--	---------------------------	---

Information also supplied that the Pompano was sighted on the surface on February 13, probably causing Japanese traffic to be diverted.

15.	16-0430	U.S.S. <u>Pompano</u>	1 medium sized tanker to be at 05H, 166E at 0300(GCT) on February 13. On February 21 the vessel is to pass through 03-20N, 159-05E.	None	ComSubPac dispatch received. The <u>Pompano</u> was engaged with the second Ultra target; see below and see also Case 18.
-----	---------	-----------------------	---	------	---

One vessel (of the Pomneo Navy class) will fuel escort vessel at 08-30N, 163-00E. Exact date and time unknown.

Positive

ComSubPac dispatch received. The Pompano sighted a naval tanker in position 8-30N 162-36E on February 17. The vessel was sighted again the next day at 1348(GCT) at 7-33N; 165-40E. (See Case 18 for further details).

Chapter II

February 2, 1943

Case 1

The information that a man of either the Exero or Taian class would arrive at Saipan on February 4, 1943, and would then proceed via Tanian and Rota to arrive at Guam on February 8, was sent by ComSubPac to the U.S.S. Flying Fish on February 2 at 0712 (COT).<sup>1</sup> On February 4, the Flying Fish was patrolling the Saipan-Bupire Route, and two days later, while closing Tanian Island, a 7000 ton unidentified freighter was sighted, anchored in Tanian Harbor. At 0440 (COT), on February 6, after determining the target's position, the U.S.S. Flying Fish fired three torpedoes. Eleven minutes later the freighter was afire and had a bad port list, and it was believed that she sank very soon.<sup>2</sup> The Flying Fish had received ComSubPac's message,<sup>3</sup> and it is probable that the target contacted was that reported in

the 020712 Ultra, since the contact was made at the time the Tyoyo or Taian class <sup>4</sup>maru was scheduled to be at Tenian Harbor.

February 2, 1943

Case 2

It was learned from an intercepted Japanese transmission of February 2, 1943, that on the following day the noon position of "I" Convoy would be 16-56 N, 143-18 E. <sup>5</sup> This information was sent by ComSubPac for action to the U.S.S. Flying Fish <sup>6</sup> which was patrolling the Saipan-Empire Route. <sup>7</sup> Although the dispatch was received, <sup>8</sup> the Flying Fish <sup>9</sup> reported no contact with "I" Convoy.

February 2, 1943

Case 3

The Shinryo Maru, departing Fais at 0900 (GCT), February 2, was scheduled to arrive at Hiike on the afternoon of February 13, according

ORIGINAL

25 November 1945

to a deciphered Japanese dispatch of February 2.  
The speed and noon positions (I time zone) of the  
maru were listed from February 3 through February  
10 12. At 1740 (GCT) on February 2, ComSubPac sent  
a dispatch to the U.S.S. Runner giving the positions  
of the Shinzo Maru for the following three days. 11  
Although the Runner received the information since  
radio reception was satisfactory, 12 it reported no  
contacts with that particular maru. However, on  
February 1 at 2034 (GCT) a convoy of two Yamabiko  
Maru class freighters and three PC escorts was  
sighted at position 20 N, 142 E. One hour and  
fifteen minutes later after firing three torpedoes  
at both the leading ship and the second ship, the  
submarine submerged. There was no question in the  
Commanding Officer's mind that both ships were  
sunk. On February 3, 4, and 5, the Runner was  
patrolling in three separate areas, and on Feb-  
ruary 6, entered the area off Palau at position

7-30 N, 134-30 E. Later that same day two Japanese minesweepers or auxiliary vessels as well as enemy planes conducted an attack, damaging the Runner.<sup>13</sup> Apparently there was no contact with the Shinyo Maru.

February 2, 1943

Case 4

On February 2, 1943, at 2347 (GCT), ComSubPac notified the U.S.S. Pompano of the noon positions (0300 GCT) on February 3 and 4 of an unidentified merchantman. The positions were 10-48 N, 145-30 E and 08-35 N, 145-00 E respectively.<sup>14</sup> The Pompano received the dispatch<sup>15</sup> and on February 3 at 2247 (GCT) in position 08-07 N, 149-34 E, sighted and attacked an escorted tanker of the San Ramon Maru class, damaging the tanker with one hit.<sup>16</sup> This ship was on a southeast course, 130 degrees, which corresponds with the course of the Ultra target. But since the Ultra target was due at 08-35 N, 145 E at 0300 (GCT) February 4, this attack occurred more than a

patrol boats were reported in the vicinity of 07 to 06 N, 151 E, the submarines reported by operational headquarters to be plying between Truk and the Admiralty Islands, were not contacted.  
19

February 8, 1943

Case 6

From an intercepted Japanese message of February 8, 1943, it was learned that an Advance Force would enter the North Channel and arrive at Truk Anchorage at 0730 (GCT) on February 9. At 1745 (GCT) on February 8, the U.S.S. Pompano received the information that this Force would enter the North Pass at Truk at 0700 (GCT) on February 9. At 1818 (GCT) on February 8, the submarine set its course at full speed for the desired position; however, due to adverse current, the Pompano was unable to reach the Pass at the specified time and no ships were sighted.

ling the Tokyo route on February 9, 1943, and at 1730 (GCT) on that day set its course for Midway, therefore, no search was made and nothing was sighted.<sup>29</sup>

The U.S.S. Tarpon also received the operational dispatch,<sup>30</sup> and on February 12, submerged 10 miles east of Miyake Shima. A search was conducted, but no contact with the enemy submarine was reported.<sup>31</sup>

February 10, 1943

Case 9

From an intercepted Japanese transmission of February 7 it was learned that seven transport vessels plus several escorts would depart from Rabaul (04 S, 152 E) at 0800 (GCT) February 8 en route to Palau (7 N, 134 E) arriving there at 2300 (GCT) on February 14.<sup>32</sup> This information was sent from ComSubPac on February 10, 1943, to the U.S.S. Runner which was patrolling submerged off Toagel Mlungui Passage, Palau.<sup>33</sup> The message<sup>34</sup>

- 
- 29 - II, Case 8, C-4.
  - 30 - II, Case 8, C-5.
  - 31 - II, Case 8, C-6.

  - 33 - II, Case 9, B-1.
  - 34 - II, Case 9, C-2.

ORIGINAL  
20 November 1945

<sup>35</sup> was received and at 0403 (GCT) on February 14, the Burner sighted a steamer standing in the Passage. This ship was later identified as belonging to the Tokyo Maru class. <sup>36</sup> Thirty eight minutes later the vessel was attacked at position 7-32 N, 134-21 E and possible sinking was reported. <sup>37</sup>

Since the convoy reported in Ultra was not due to enter Palau until 2300 (GCT) on February 14, <sup>38</sup> the submarine action report suggested that the torpedoing of the freighter had convinced the Japanese to re-route the transports through another passage. <sup>39</sup>

February 12, 1943

Case 10

A maru, believed to be of the Kikawa Maru class, was scheduled to depart from Yokosuka at 0400 (GCT) on February 11, 1943. <sup>40</sup> The noon

positions (GCT) of the vessel were listed from February 13 through 16 and were sent to the U.S.S. Sunfish, U.S.S. Flying Fish, and the U.S.S. Tunny. If in the vicinity, the Sunfish was directed to intercept the maru on February 13 or 14; but to be on the lookout for the Tunny which might be passing through the area without torpedoes. The Flying Fish was to be on the alert for the vessel on February 15 and 16, and at the same time to note the departure of the Suwa Maru from Saipan en route to Truk on February 15 but whose exact schedule was unknown. Since translations of the Japanese dispatches concerning the date of departure of the Suwa Maru seemed to differ, it was possible that the vessel was scheduled to leave Saipan on February 11, rather than on February 15. The ComSubPac message was received and on February 12 the U.S.S. Sunfish was in the Marcus Island area (26 N, 158 E).

26 November 1945

On February 14, a surface patrol was conducted near Chichi Jima (23 N, 141 E) and at 0341 (GCT) on that same day, the vessel headed for the assigned area. The patrol continued on February 15, and on the following day, at 1610 (GCT) the Sunfish reported a radar contact which was later lost due to poor visibility, high seas and rain. <sup>44</sup>

On February 16, the U.S.S. Flying Fish was patrolling northeast of the Pagan and southeast of the Agrihan Islands in the Marianas, covering the Roke-Magoya-Truk route. At 0444 (GCT) on that same day, the submarine sighted a 6000-ton freighter with air and surface escorts on course 163 in position 18 N, 145 E. Firing four torpedoes, the Flying Fish sank the target with two hits. <sup>45</sup> This freighter was the Nyura Maru according to a Japanese message of February 16 which reported the sinking in position 18-35 N, 145-55 E at 0500 (GCT). <sup>46</sup> Since the ship from Yokosuka, originally thought to be a Kikawa Maru class vessel, was scheduled to reach 18 N, 145-55 E at 0300 (GCT) February 16 on a southeast course, this is a positive contact with this Ultra target.

26 November 1945

The U.S.S. Tunny departed from the assigned area on February 11, at 0830 (GCT).<sup>47</sup>

February 13, 1943

Case 11

Radio Intelligence decoded and translated a Japanese dispatch of February 12, 1943, containing information concerning the Hiyoshi Maru.

With a subchaser as escort, the vessel was scheduled to be in position 6-55 N, 150-45 E at 0300 (GCT) on February 14, en route to South Channel, Truk.<sup>48</sup>

This message together with the information that a Japanese submarine would arrive at Truk at 0800 (GCT) on February 17 or 18, or perhaps at an even later date, was sent to the U.S.S. Stingray for action.<sup>49</sup> In the same operational dispatch, ComSubPac notified the U.S.S. Tarpon that the "B" convoy had taken refuge from a storm at the toe of Niishima Island in position 34-22 N, 139-15 E.<sup>50</sup>

Radio reception was satisfactory throughout the Sixth War Patrol of the U.S.S. Stingray; therefore, the ComSubPac dispatch was

-

51 received. On February 14, the Stingray was patrolling south and west of Losap Island, and south on a westerly course from South Island, Truk Atoll searching for the Ultra target. At 2045 (GCT) on that same day, a small trawler was sighted at position 7-02 N, 150-45 E. From February 16 through 20 a patrol was conducted west, southwest, and northwest of Truk between East Fayo and Namonuito Island. There was no further contact with any enemy vessel. 52

The U.S.S. Tarpon was searching for an enemy submarine from February 10 through 15, in the vicinity of Mikura Shima, Miyaka Shima, Kosu Shima and Manila. No contact with the con- 53 voy was reported, and on February 18, a Japanese dispatch was intercepted which revealed that the 54 convoy had resumed its course.

a Japanese destroyer at position 07 N Longitude  
180 (no date time given) was sent to the U.S.S.  
Swordfish on February 13, 1943.<sup>55</sup> The submarine  
received the dispatch and crossed the 180th<sup>56</sup>  
meridian at 2032 (GCT) on February 14 to search  
for the vessel. Nothing was sighted while the  
Swordfish was in this area.<sup>57</sup>

February 13, 1943

Case 13

From Radio Intelligence, operational  
headquarters received the information that two  
unidentified merchantmen were leaving Kwajalein for  
Saipan at 0100 (GCT) on February 15 and Kusa for  
Eniwetok at 2100 (GCT) on February 13, respectively.  
Another merchantman was en route to Mille from  
Kwajalein on February 13 at the time that this in-  
formation was sent in an operational dispatch from  
ComSubPac to the U.S.S. Pompano.<sup>58</sup> In the same  
dispatch, the U.S.S. Flying Fish and the U.S.S.  
Stingray were ordered to search for an enemy

submarine en route to Truk from the Empire.  
Its noon positions (I time zone) were listed for  
February 12, 15 and 17 the time of its arrival  
at South Pass, Truk were given. 59

The ComSubPac message was received 60  
and at 0825 (GCT) on February 13, 1943, the U.S.S.  
Pompano entered the Marshall Islands Area. Later,  
on the same day it submerged 70 miles southwest  
of Kwajalein, and on the following day the submarine  
set its course to arrive on the line between Ensal  
and Eniwetok by the night of February 15. On Feb-  
ruary 15 a ship of narrow beam under 500 tons was  
sighted. 61

No entry was made for February 16  
in the War Patrol Report but on February 17, a  
naval tanker was sighted at position 8-30 N,  
162-36 E. The Pompano trailed the vessel until  
it reached position 7-33 N, 165-40 E at 1548 (GCT)  
on the subsequent day. An attack was conducted and  
the maru was damaged with two hits. 62 However, due

to the difference in position it is assumed that this contact was not with one of the vessels reported in Ultra 132311.

Although the enemy submarine had<sup>63</sup> been reported west of the Bonin Islands, the U.S.S. Flying Fish on February 14, 15 and 16 was patrolling in the Marianas near Pagan Island. On February 15 a 6000-ton freighter with air and surface escorts was sighted. Four torpedoes were fired and after two hits, the vessel was<sup>64</sup> sunk. The U.S.S. Stingray entered the assigned area at 1430 (GCT) on February 16 in order to intercept the enemy submarine but there were no<sup>65</sup> contacts and nothing was reported.

February 14, 1945

Case 14

It was learned from an intercepted Japanese dispatch of February 14, 1943, that the Shinkoku Maru would leave Jaluit at 2000 (GCT) on

-

26 November 1945

that day en route to Evajaloin. The information was also supplied that the Pompone had been sighted by the enemy on the surface on February 13 at position 07-00 S, 154-30 E. This intelligence was sent by ConSubPac to the U.S.S. Pompane at 2342 (GCT) on February 14. Nothing was reported on the following day by the submarine other than a small vessel under 500 tons; however, on February 13, a naval tanker was attacked and damaged by two hits at position 7-33 N, 165-40 E. Due to the length of time between the sailing of the Shinkoku Maru and the sinking of the naval tanker, it is improbable that they were the same vessel. In addition, the vessel attacked was in a position farther to the west than the route of the Ultra target.

February 16, 1943

Case 15

In an operational dispatch of February 16, 1943, ConSubPac notified the U.S.S. Pompane of the noon position for February 18 of one medium-sized tanker. It was scheduled to

- 
- 66 - II, Case 14, A-1.

26 November 1945

due to rain and low visibility, nothing was sighted. At 0357 (GCT) at position 7-35 N, 134-25 E on February 19, two destroyers were sighted and when the range closed it was seen that there was a convoy made up of two freighters each flanked by a destroyer. Four charges were fired at the right hand destroyer, but there were no hits. The firing was then shifted to the freighter, similar to the Akagi Maru. At 0556 (GCT) one torpedo was fired at the enemy vessel followed by two more charges; however, there was no report of possible damage or sinking. 73

February 16, 1943

Case 17

According to an intercepted Japanese Intelligence dispatch the Yamagiri Maru was scheduled to depart from Tarawa at 1900 (GCT) on February 15, 1943, and the positions for February 17, 19, 22 through 24, and 26 were listed for various times. 74 This information was sent to the

73 - II, Case 16, C-2.

74 - II, Case 17, A-4.

26 November 1945

U.S.S. Pompano and the U.S.S. Sawfish on  
75  
February 16, 1943.

On the subsequent day at 2230 (GCT)  
the Pompano contacted a Japanese naval tanker at  
position 8-30 N, 162-36 E and trailed it to position  
7-33 N, 165-40 E. This was in a direction op-  
posite to that reported in the operational  
76  
dispatch 160905.

77  
The ComSubPac message was received  
but the U.S.S. Sawfish was too far north until  
February 25. At 2000 (GCT) on February 25 it set  
its course for Tanaga Shima, an island at 30-30 N,  
130-30 E, the position of the Yamakiri Maru for  
that day. However, only a patrol vessel was  
sighted at 1655 (GCT) on the following day and  
a small fishing vessel on February 27. No  
78  
further contact was reported.

February 17, 1943

Case 18

On February 17, 1943, ComSubPac sent  
an operational dispatch to the U.S.S. Stinson  
concerning the Japanese submarine I-6. The noon

February 18, 1943

Case 20

It was learned from an intercepted dispatch of February 17 that a two-ship convoy had left Yokosuka February 11 and that an escort ship from Kwajalein would rendezvous with the convoy at 2300 (GCT) February 20. On the 23rd the convoy would divide, one ship going to Kwajalein and the other to Tarawa.<sup>91</sup> On February 18 ComSubPac notified the U.S.S. Halibut that the convoy would be at 14N, 161-41E at 0300 (GCT) February 20 and would meet an escort at 2300 on that day. The U.S.S. Plunger was informed that one of the ships would reach Tarawa February 24.

On February 19 the Halibut, searching along the Espire-Kwajalein route, sighted at 2220 (GCT) a single freighter on a northwest course, attacked and sank it at 1000 (GCT) February 20. The freighter was sighted in position 14-33 N, 161-17 E. The Ultra targets were due on a southeast course in position 14 N, 161-40E at 0300 (GCT) February 20. The freighter, then, cannot have been either of the ships of the convoy nor the escort assigned to meet it at 2300 (GCT) February 20. It was sighted while the U.S.S. Halibut was searching for the Ultra targets, but the latter were not contacted.

91 - IF, Case 20, A-1, A-2.

92 - II, Case 20, B-1.

ORIGINAL  
26 November 1945

The submarine searched for the accompanying vessel but decided that the target had been unaccompanied and abandoning the search, set its course for Truk at 0500 (GCT) on February 21.<sup>93</sup>

On February 24, at 1300 (GCT) the U.S.S. Plunger set its course for the Tarawa entrance, and seven hours later began a close patrol covering the entrance. A freighter of the Kama Maru class accompanied by a small escort vessel was sighted at 0116 (GCT) on February 25. Two torpedoes were fired at the enemy ship but there were no hits, and the target was abandoned because of increased enemy reinforcements.<sup>94</sup> This is a probable contact with the target reported in Ultra.<sup>95</sup>

February 18, 1943

Case 21

One unidentified Japanese submarine was scheduled to depart from Tokyo Bay on the afternoon of February 18, and enter Kii Channel the following morning.<sup>96</sup> This information was sent

- 
- 93 - II, Case 20, C-2.
  - 94 - II, Case 20, C-5.

to the U.S.S. Tarpon in ComSubPac dispatch 180930. <sup>97</sup>

Although ComSubPac's message was received, due to <sup>98</sup>  
rough weather the search for the enemy submarine  
was prevented. There was no contact and on February  
18, the Tarpon set its course for Midway. <sup>99</sup>

February 20, 1943

Case 22

In an operational dispatch of February  
20, the U.S.S. Halibut learned that one unescorted  
vessel of the Sinkoku Maru class had departed from  
Kwajalein 2000 (GCT) February 17 and would pass  
through position 15 N, 161-30 E, and 15-40 N, 150 E  
en route to Saipan. If in position, the submarine  
was ordered to intercept the vessel. <sup>100</sup>

In the same message, the U.S.S. Tarpon,  
having left the Yokosuka area for Midway, February  
18, was ordered to search for three Japanese sub-  
marines reported to be headed east from position  
33-25 N, 148 E at 0300 (GCT) on that same day.

Radio reception for the U.S.S. Tarpon  
105 was complete and though the submarine was in the  
area, there was no mention of sighting subs on or  
106 around February 18.

February 21, 1943

Case 23

From Radio Intelligence operational  
headquarters received the information that a  
merchantman of either the Suta Maru or Huzimi Maru  
class had departed Ponape February 19 en route to  
107 Jaluit. On February 21, ConSubPac notified the  
U.S.S. Pencard of the route of the ship plus the  
fact that an escort vessel might be accompanying  
108 or preceding it. The submarine in the area but  
not in the exact position of the enemy vessel, was  
patrolling in the vicinity of position 8-30 N,  
162-36 E on February 16 where it sighted a tanker  
and trailed it through the following day. No con-  
109 tact resulted with the Ultra target.

ORIGINAL  
26 November 1945

In the same Ultra dispatch, the U.S.S. Stingray was given additional information in regard to the merchant ship which had been scheduled to pass ten miles south of Pulusuk Island. The submarine had not been given the date in the previous dispatch, but it was now notified that the vessel would be at the designated position on February 21.

At 1920 (GCT) on February 20, the Stingray was patrolling to the east and southeast of Pulusuk Island. Several patrol vessels were sighted, but no contact was made, and the submarine set its course for Truk.

February 23, 1943

Case 24

In a February translation of a Japanese intelligence report of December 22 it was learned that an enemy submarine, the I-18 would be at position 17-08 N, 144-44 E at 0900 (GCT) on that same day and at position 9-29 N,

114  
150-24 R at 0800 (GCT) on December 24. This in-  
formation was sent in a ComSubPac dispatch to the  
U.S.S. Halibut; however, the dates were given for  
February rather than December. 115  
It was further  
learned from another Japanese dispatch that a  
transport vessel which was part of a convoy would  
pass through position 9-05 N, 153-30 E at 0300 (GCT)  
on February 24, en route to the North Pass of Truk  
at 0400 (GCT) on the following day. 116  
This informa-  
tion was sent to the U.S.S. Halibut for action. 117

On February 18, the U.S.S. Plunger  
had been notified to search for a ship due to ar-  
rive at Tarawa on February 24. 118  
In the ComSubPac  
message 230700 the Plunger was further notified  
that the vessel had been delayed and positions  
for February 23 and 24 were listed. 119

The Halibut conducted a submerged  
patrol along the Empire-Truk and Kwajalein-Truk  
routes on February 22 and 23. Though the submarine  
was in the designated area there were no contacts  
and the patrol was uneventful. 120

ORIGINAL  
26 November 1945

On February 23, the U.S.S. Plunger conducted a patrol near Makin and on the following day, set its course for Tarawa, covering the entrance to the Island. Nothing was sighted. <sup>121</sup>

February 25, 1943

Case 25

The Yamakuni Maru, departing from Wake Island at 0600 (GCT) on February 26 en route to the Empire, was scheduled to pass through position 24 N, 150 E. <sup>122</sup> In a ComSubPac dispatch of February 25, the U.S.S. Kingfish received this information for action. <sup>123</sup> From February 23 to the 28th, the submarine patrolled the area around Midway, but nothing was sighted. It was necessary that the Kingfish slow to one engine speed; therefore, there was a possibility of its being unable to reach the position at the desired time. <sup>124</sup> In the same Ultra dispatch, the U.S.S. Plunger was informed that the course of the vessel which it was to meet at Tarawa, had been altered. <sup>125</sup> Another <sup>126</sup>

target, a 14,000 ton fleet tanker plus one small escort, was departing Jaluit at 2000 (GCT) on February 26. The destination of the enemy ship was indefinite, but it was dropping its escort in position 8 N, 160 E. The Plunger was ordered to intercept this new target if possible. <sup>127</sup>

On February 25, at 1800 (GCT) the Plunger was patrolling the entrances to Jaluit, and two days later, a Shiretoko class Maru was sighted at position 43° and 16 miles off the coast. At 1300 (GCT) on February 27, an attack was conducted with four torpedoes being fired. <sup>128</sup> The tanker was damaged, but not sunk. According to Japanese intelligence reports of February 28, the Iro Maru a tanker of the same class as the Shiretoko Maru was attacked and damaged at 1327 (GCT) on February 27, in position 280 degrees <sup>129</sup> and 135 miles from Jaluit. Although the positions of the two tanker's differ in their positions off Jaluit Island in the report given by the Plunger, <sup>130</sup> and that given by the Japanese Intelligence dispatch

131  
from Commander of the Jaluit Base Force, it is positive that the vessel attacked by the Plunzer was the Iro tanker since the times of the attacks coincide.

Meanwhile, the U.S.S. Halibut had received information from ComSubPac that two unidentified vessels would pass through position 11-47 N, 143-38 E and proceed to position 7-40 N, 147-34 E where they were scheduled to meet an escort at 0300 (GCT) on February 27. 132

On February 26, 27 and 28, the Halibut patrolled the designated areas. Nothing was sighted and the search was abandoned. 133

February 26, 1943

Case 26

In a dispatch dated February 26, 1943 ComSubPac disclosed to the U.S.S. Triager that a transport vessel would arrive at Palau at 0730 (GCT) March 1, via position 00-20 N, 147-47 E at 1400 (GCT) on February 26, and 01-20 N, 146-12 E where

the escort vessel would be dropped seven hours  
134  
later.

The Trigger, en route from Midway,  
was unable to reach Palau for operations and on  
February 26 took its position on the Palau-Newak  
Course. At 2134 (GCT) on that day, a freighter  
similar to the Kasii Maru was sighted, and 16  
minutes later it was attacked. Four torpedoes  
were fired but the target successfully avoided  
the charges. There were no other contacts, and  
135  
apparently the transport was not sighted.

In a previous dispatch the U.S.S.  
Halibut had received information concerning two  
136  
unidentified vessels. The schedule of the ships  
137  
had been altered, no contact was later reported  
138  
by the submarine.

February 27, 1943

Case 27

A freighter en route from the Short-  
land Islands was scheduled to meet an escort vessel  
at 0500 (GCT) on February 28 in position 3-55 N,

166 E. Fifteen hours later it would pass through  
position 5-50 N, 167-15 E.<sup>139</sup> This information was  
sent to the U.S.S. Plunger for possible action  
in a ComSubPac message of February 27.<sup>140</sup> At this  
time, however, the submarine was engaged with a  
Ehretake class mru.<sup>141</sup> On March 1 an unidentified  
vessel was sighted, but no contact was made, be-  
cause of darkness.<sup>142</sup>

February 27, 1943

Case 28

From a Japanese Intelligence dispatch  
it was learned that an unidentified ship was  
scheduled to arrive at the North Channel of Truk  
at 0530 (GCT) on March 1. Positions were given  
for February 28 at 1600 and 2300 (GCT).<sup>143</sup> On  
February 27 this information was sent to the U.S.S.  
Halibut,<sup>144</sup> which was conducting an uneventful patrol  
between the Onon and Hall Islands.<sup>145</sup> Four days later  
on March 3 the submarine was patrolling the Saipan-  
Empire track when two freighters were sighted, one

of which, was similar to the Manila Maru, a passenger freighter. An attack was made and after two hits it was believed that the passenger vessel was sunk, at position 10-18 1/2 N, 146-42 1/2 E. 146  
This contact was not made with the target reported 147  
in Ultra.

February 28, 1943

Case 29

The U.S.S. Sawfish learned in an operational dispatch from ComSubPac on February 28 148  
that an important maru would meet an escort vessel at 0300 (GCT) on March 2 at a given position, en route to Bungo Suiko, arriving there at 0100 (GCT) 149  
on the following day.

A patrol boat was sighted in this area on February 28, and on March 1 the submarine conducted a periscope patrol. A search was made but there was no contact, possibly due to heavy 150  
seas.

February 5

Closed Tinian Island observed SUNHARON  
Roadstead 3500 yards from coastline.....

February 6

1440 (K) Closed Tinian Island to reconnoiter  
anchorage. One 7000 ton freighter,  
unidentified, was anchored in Sunharon  
Roadstead. Two small trawlers were  
patrolling to seaward of the harbor.  
No other ships at anchor, and no addi-  
tional anti-submarine measures noticeable.  
After determining the target's position  
and having taken a position presenting an  
acceptable track angle, fired three tor-  
pedoes, straight stern shots, at an  
average range of 3500 yards. Eleven  
minutes after firing her bow was at the  
waterline, she had a bad port list and  
was on fire forward. I did not see her  
sink, I feel confident she did, and very  
soon.

0634 (K) Patrolling on surface across track of  
shipping in Area \_\_\_\_\_.

ORIGINAL

26 November 1945

Case 3, No. C-2 (Cont.)

0934 (Z) Sighted ship. Contact #2. Dove and commenced submerged attack. When range closed sufficiently a second ship was sighted astern of the first. Both ships were single stack freighters with kingposts forward and aft, of Izumabiko Maru class. They were making frequent radical zigzag. Three P.C. escorts were sighted in position along the near side of the convoy. Made ready the bow tubes and at 1045 (Z) fired three torpedoes at the leading ship, on an 80° divergent spread. Attack #1. After twenty and twenty-five seconds two torpedo hits were heard. Immediately after firing the first three torpedoes, shifted to the second ship and fired three torpedoes at her at 1200 yards range and a sharper track, using a similar spread. Attack #2. Forty seconds after firing four and five respectively, two more torpedo explosions were heard. After the fourth explosion neither freighter's screw could be heard. Two minutes and two minutes and five seconds after firing at second ship two dull explosions were heard. These may have been internal explosions in target. Sound reported crackling or rumbling noises which were targets breaking up. We were inside the screen but about 500 yards in front of the second escort at the time of firing. Altered course to evade and went to deep submergence after a quick look at the leading ship showed her settling and much brown smoke in evidence. There is no question in the Commanding Officer's mind but that both ships sank practically at once.

1815 (I) Headed for better area. Set course for Area \_\_\_\_\_.

February 5

2020 (I) Entered Area \_\_\_\_\_.

February 6

0955 (I) Patrolling submerged five miles off Toagel Island Passage, Palau.  
1052 (I) Sighted two minesweepers or auxiliary vessels of about six hundred tons, standing out of entrance and apparently listening for submarines (contact #3). We believed larger ships might be following them out so commenced approach. Both vessels were making about five knots, stopping occasionally and steering various courses within 90 degrees of 270. No echo ranging was heard. Leading vessel was flying signal flags. Both vessels smoked continuously. After about an hour leading vessel appeared to hear us because the angle on the bow stayed around zero and she closed slowly. Later events indicate she may have tipped off the planes.  
1241 (I) The first of 6 depth charges or aerial bombs were heard fairly close astern. Sound could hear no screws, and periscope observations revealed nothing. The water here is ideal for planes to spot submarines.

TOP SECRET ULTRA  
R.I.P. 341

ORIGINAL  
26 November 1945

Case 3, No. C-2 (Cont.)

Being in the lee of the island, the water is calm, light blue and glassy smooth. Each time a depth charge or bomb was heard no screws could be picked up. One bomb was dropped fairly close while the Commanding Officer had the periscope up trying to find out who the bombs or depth charges were meant for.

1300 (I) A small sampan was sighted astern at about 1000 yards and heading to sea. On surfacing a serious oil leak was discovered in the stern plane tilting hydraulic pump. It appeared that to make repairs it would be necessary to put the stern planes out of commission, so it was decided to retire to northwest corner of area to accomplish the work. The leak was in the gasket between the pump body and valve plate of the Waterbury A end, and threatened to drain all our hydraulic oil out of the system.

C - Submarine Action Report

U.S.S. Pompano

Fourth War Patrol

No. C-1

Radio Reception: Reception of NPM on the surface  
was good throughout the patrol.

No. C-2

February 4

0847 (K) Enroute to a desired position N.W. of TRUK.  
Lat. 08-07 N Long. 149-34 E conducting a  
surface periscope search sighted tops of a  
ship. Submerged and conducted attack on  
Tanker with escort and damaged Tanker with  
one hit.

February 6

1030 (K) Lat. 6-58 N Long. 151-59 E sighted a patrol  
vessel on a S course.  
1142 (K) Lat. 07-3 N Long. 151-49 E made our third  
approach on a heavily smoking "catcher"  
type patrol vessel not worth a torpedo.  
Course S. He passed again on a N course  
one hour later.  
1352 (K) Lat. 07-02 N Long. 151-42 E sighted twin  
tail, 4 motor patrol plane.  
1432 (K) Same position sighted a two motor torpedo  
plane. Patrolled a N.W. S.E. line 4 to 5  
miles off KUOP ATOLL to cover S and some  
W approached to OTTA PASS.

February 7

0719 (K) Lat 6-50 N. Long. 151-43 E sighted "Catcher"  
patrol vessel.

C - Submarine Action Report

U.S.S. Runner

First War Patrol

Co. C-1

Radio Reception: Radio reception was satisfactory  
as no submarine messages were  
missed.

No. C-2

February 10

Reloaded and at 0119 (I) surfaced and  
ran along most probable track of ship-  
ping but no contact developed. Today  
we ran submerged patrol resting up after  
yesterday's all day attack.

1640 (I) Surfaced.

February 11-12

Patrolling surfaced and submerged in  
area.

ORIGINAL

23 November 1945

Case 9. To. C-2 (Cont.)

February 13

Patrolling submerged off Toegel Mlungui Passage, Palau. Sound could hear the surf beating on the reef.

0829 (I) Sighted auxiliary patrol vessel, (Same as sighted on 6 Feb.), and commenced approach. (Contact #5). Vessel was going very slow, about five knots, and apparently listening. Although we picked up his screws he evidently did not hear us. When range closed to 1200 yards decided he was too small a target to be worth stirring up the place, in view of hoped for bigger game, so we altered our course. Do not believe he knew we were there. During the afternoon this and a similar patrol vessel were sighted intermittently patrolling off the channel entrance. Occasional distant echo ranging was heard during the afternoon. At one time the engine room reported a distant explosion. Sound did not hear this but immediately afterward picked up echo ranging. Probably a false contact.

February 14

Patrolling submerged off Toegel Mlungui Passage, Palau. Sighted steamer standing into the passage. (Contact #6). No escort in sight. This ship was later identified as a HOGAN class freighter of 7150 tons. Commenced submerged approach.

1303 (I) Fired 3 bow tubes and 22 seconds after firing the first a sharp torpedo explosion was heard. Eight seconds later the second torpedo hit. Sound reported that targets screws had stopped but picked up the fast screws of an escort on another bearing. Two observations after about 30 seconds revealed the target to be sinking with main deck awash.

U.S.S. Sunfish

Second War Patrol

No. C-1

Radio Reception: Radio Reception was complete.

No. C-2

February 12

0800 (K) Cleared Marcus 300 mile circle.  
1246 Sighted Japanese type 97 flying boat  
bearing 160° Rel. distance 7 miles on  
parallel course (Wake to Tokyo?) Dived.  
Serviced torpedoes, watered batteries  
and surfaced at 1510 (K). (Plane con-  
tact #1). Apparently SUNFISH not sighted.  
Not seen on radar.

February 14

0930 (I) Conducted surface patrol, both periscopes  
continuously manned. Seas picking up from  
1241 northward. 60 miles from CHICHI JHIMA air  
base dived to avoid possible detection by  
aircraft.  
1354 Sighted HAHU SHIMA group. Surfaced and  
1824 headed for assigned area. No shipping  
sighted. Within 50 mile circle of CHICHI  
JHIMA.

February 15

0535 (I) Dived and conducted high periscope patrol  
1826 during day. Surfaced in heavy seas ac-  
companied by high winds from northward.  
Patrolled westward toward area at one engine  
speed.

ORIGINAL

26 November 1945

Case 10. No. C-2 (Cont.)

February 16

0110 (I) SJ radar contact at 11,500 yards. Headed for contact. Radar indicated more than one ship. Visibility poor; rain; no horizon; seas force 6 from North. Determined contact was on northerly courses, zig-zagging, at 14 knots and we were abaft beam, so headed north at full power on 4 main engines to gain favorable firing position. Heavy seas pounded superstructure, came over bridge and down conning tower hatch. Pit log jumping from 10 to 14 knots. Average 12 knots. Range opening impossible to get into firing position due to heavy seas. Radar lost contact at 15,000 yards.

0958 Surfaced and commenced surface patrol toward  
1305 area; both periscopes manned. #1 periscope observer reported a faint wisp of smoke on the horizon which disappeared almost immediately, bearing 230 T. Ran 10 miles in direction of reported smoke and when nothing more was seen decided it must have been a cloud on the horizon, of which there were many which could have been mistaken for smoke. Continued to westward toward assigned area at one engine speed. Sighted mast and stack of ship through #1 periscope, bearing 250 T, estimated distance 15 miles. Changed course to port contact astern for surface tracking but range seemed to be closing rapidly, as it was soon picked up from bridge level.

February 15

(No comments on this day. - Ed. Note)

February 16

Patrolled northeast of Pagan and southeast of Agrihan Islands, covering KORE-MAGAYA-TRUK route.

1444 (K) Bearing 021°, 24 miles from Pagan Is. Sighted 6000 ton freighter with air and surface escorts. Made approach and fired 4 torpedoes - 2 hits, and freighter's masts went under in 28 minutes. I saw the bombs fall close aboard, and watched the escort (500 ton armed trawler) maneuver radically and drop depth charges at random. He picked up survivors and headed for Pagan after the target sank.

February 17-25

Surface cruising except for daily predawn dive. Passed within 100 miles of WAKE, and no plane contacts.

Guard Division #62, Mille Detachment, serial  
111302. Reference serial 111835.

Yamakuni Maru and Hinode Maru are at present unloading cargo at Mille. Since cargo working facilities are limited there, and because of bad weather in vicinity, the Yamakuni Maru's unloading of cement is behind schedule. Today, the 12th, by which date unloading was scheduled to be finished, the amount still to be unloaded is 1200 tons. Therefore, desire to advance the unloading of the Hinode Maru and have the Yamakuni Maru proceed immediately from Mille to Kwajalein where, after completion of unloading of the 1200 tons scheduled to have been left at Mille, change its scheduled movements so that it may proceed to Wake Island. We will ship these 1200 tons to Mille in one of our boats as opportunity offers.

TOP SECRET ULTRA  
R.I.P. 341

ORIGINAL  
26 November 1945

Case 13, No. C-8 (Cont.)

1943      Surfaced and patrolled on a westerly course approximately nineteen miles south of South Island, Truk Atoll.

February 15

0745 (L) Sighted diesel patrol vessel, trawler-type; distance about seven miles, bearing 045<sup>0</sup>T. on a southwesterly heading.  
Position: Lat. 07-02N.  
Long. 150-45E.

February 16

Conducted submerged patrol covering approaches West and Southwest of Truk. Have been unable to fix position for three days, as skies heavily overcast with practically continuous rain. Sea glassy smooth.

February 17

0130 (L) Entered area \_\_\_\_\_ North. Patrolled routes N.W. of Truk.

February 18, 19, 20

Conducted submerged and surface patrol N.W. of Truk and between East Fayu and Namonuita Island. Sea was glassy smooth, full moon, exceptional visibility day and night.

February 20

1935 (L) Surfaced and started to proceed to a point twelve miles west of Piaanu Pass.

February 16

Patrolling submerged off Toagel Mlungui Passage, Palau. Rain and low visibility today. No night fix.

February 17

Patrolling submerged off Toagel Mlungui Passage, Palau. Today the weather is poor with much rain and a good swell running. Visibility is so poor that bearings or sights are impossible to obtain.

1420(I)

Sighted destroyer apparently proceeding to southwest at 22 knots. (Contact #7). No echo ranging was heard. Could not be seen through rain squall until after sound contact. Range at sighting was 5500 yards and increasing. We believed she might be preceding a larger ship and closed her track but nothing further developed.

February 18

No entry made.

February 19

One destroyer was sighted but the other escort which had been picked up on sound was not seen. When the convoy was about five miles from the pass, the destroyer reversed course to the southwest, leaving the freighters to head around to the east and enter the pass alone. This change of course made the distance to the freighter's track so great that there was no possibility of making an attack.

ORIGINAL  
26 November 1945

Case 16, No. C-2 (Cont.)

1255(I)  
1257(I)

Picked up echo ranging from two ships. Sighted two destroyers and after some tracking discovered that they were sweeping back and forth along a line running southwest from the entrance. (Contact #9) When the range closed it was seen that this was a convoy made up of two freighters together, more or less abreast of each other with one destroyer on each flank. A zig put us dead ahead of the convoy at about 2000 yards range. The right hand destroyer was then heard to speed up to 200 turns.

1455(I)

Fired the four stern tubes at the destroyer at a range of 1400 yards, using a two degree divergent spread. (Attack #6). No hits were heard and it is believed the destroyer saw the torpedo wakes in the smooth water and had time enough to avoid. Shortly after firing sound reported this destroyer had stopped. He was later observed to parallel the torpedoes and head down the tracks. We then shifted to the left hand freighter and lined her up for the bow tubes. This freighter was seen to be a single stacker with kingposts and similar to AKAGI MARU of 7390 tons.

1456(I)

Fired one torpedo at her, at 600 yards range and a sharp track. (Attack #7). Immediately afterwards an aerial bomb exploded very close along the port side shaking ship severely and giving her a quick snap roll, first to starboard and then to port, which threw most people off their feet. Fired #2 and #3 tubes using at 8 second firing interval and a 2 degree divergent spread. After about thirty seconds a torpedo hit was definitely heard on the freighter. Some people claim to have heard two. Sound gear, bow plane power and both periscope hoist motors were

Radio Reception: 1. Reception of NPM Fox Schedule was good on all allotted frequencies except the low freq. 26.1 kos.

No. C-5

February 17

0320(I) Lat. 30-45 N. 135-30 E.  
Sighted light bearing 270°T. Closed to 8000 yards when radar indicated two ships. Believed this to be a trap so decided to run ahead until daylight as moon was very bright and I did not feel I could close without being seen. Opened range to 15,000 yards and dove at 0537. Had checked target course 083°T, speed 8. Rapid increase in bearing rate near point of firing showed increase in speed. Consequently, upped speed to 10 kts. and target drew across bow. At 0639 fired three torpedoes (Attack #1) with mean gyro angle 035°T, range 1180 yards, depth setting 6 feet. One hit. One torpedo porpoised before reaching track and target was believed swinging away when hit. Ship sank in 3 minutes. Mean track angle for spread 125S. Believed target was a "Q" ship of about 4000 tons, similar to

ORIGINAL

25 November 1945

Case 17, No. C-5 (Cont.)

- one encountered by Trigger, but without kingposts. There was no evidence of second ship at point of firing so believe radar had separate bearings on the two masts when he reported the ships. Target similar to Page 134, OMI 208J. Remained submerged due to possible air search after sinking.
- 1907(I) Lat. 30-45N, Long. 135-33E. Sighted steady white light bearing 180°T. Turned to close, Target on easterly course. Radar contacted target at 15,000 yards. Did not feel that we could close on surface due to brilliant moon, so paralleled and drew ahead on four engines.
- 2200(I) Drove 15,000 yards ahead of target. Ran at 40 feet and conducted radar approach until range decreased to 5,000 yards, after which time approach was made with periscopes.
- 2229(I) Fired three torpedoes from bow tubes (Attack #2). Mean gyro angle 03, mean track angle 87 port, depth setting 10 foot, range 2100 yards. Divergent spread 0°, 22R, 22L. Two hits, one at foremast, one at after end of after well.
- 2235(I) Heard depth-charge explosion estimated range 500 yards. Searched by periscope, could see nothing.
- 2238(I) Target sank.
- 2250(I) Heard propellers (light) bearing 190° relative, which increased in intensity and which changed to 250° relative. This was followed by eighteen explosions which may have been depth charges, but if so were at a range of at least 2000 yards. Went to 200 feet when explosions commenced and ran silent.
- 2357(I) Came to periscope depth. Nothing in sight.

ORIGINAL  
26 November 1945

Case 17. No. C-5 (Cont.)

February 22

- 0130(I) Abandoned chase and headed north for area.  
0502(I) Submerged just south of southern boundary of area.  
0745(I) Lat. 30-15, Long. 132-30.  
Sighted ship bearing 082°T, distance 8,000 yards. Conducted periscope approach. On second observation, sighted two land-based patrol planes circling in vicinity of target. Thought I had something of importance. Ran at 80 feet between periscope observations. Turned out for stern shot, 700 yard run. As I looked for final check discovered target was a Russian freighter of about 3,000 tons. No lookouts in evidence. Did not fire. Planes were evidently searching vicinity for me after last night.  
1531(I) Lat. 30-31, Long. 132-35.  
Sighted sampon of about 100 tons. Jap ensign painted on bow. Scrutinized him from 500 yards.  
1850(I) Surfaced, commenced patrolling, 5 kts.  
1930(I) Radar made contact at 3500 yards. When picked up by sight it was found to be what appeared to be a patrol boat closing at high speed. Went ahead flank speed. Range closed to 2,000 yards but by that time we have speed on and opened range quickly to the south. Lost contact at 8,000 yards.

February 24

Periscope patrol during day, nothing sighted.

February 26

- 0500(I) Submerged and commenced patrol to westward toward Tanaga Shima. No contact during day.  
1903(I) Surfaced and set course for point south of Tanaga Shima for special mission.

U.S.S. Runner

First War Patrol

No. C-1

Radio Reception: Reception was satisfactory as no submarine messages were missed.

No. C-2

February 19

Patrolling submerged off Tongol Klungui Passage, Palau.

1038(I) Heard echo ranging and headed for it.

1045(I) Echo ranging could be heard from two different ships on the same general bearing. Sighted masts on same general bearing as echo ranging and commenced approach. (Contact #3) When range closed sufficiently two freighters were seen heading up to the pass from the south on about 050 true. One destroyer was sighted but the other escort which had been picked up on the sound was not seen. When the convoy was about five miles from the pass the destroyer reversed course to the southwest, leaving the freighters to head around to the east and enter the pass alone. This change of course made the distance to the freighter's track so great that there was no possibility of making an attack. We shifted to the destroyer and tried to close her track but her course took her well clear of us. Distant echo ranging could still be heard until 1145(I). We then headed back toward the entrance in the hope that another convoy would come along.

1255(I) Picked up echo ranging from two ships.

first to starboard then to port, which threw most people off their feet. Fired #2 and #3 tubes using an 8 second firing interval and a 2 degree divergent spread. After about thirty seconds a torpedo hit was definitely heard on the freighter. Some people claim to have heard two. Sound gear, bow plane power and both periscope hoist motors were reported out. West to 200 feet and began evasive tactics. Later six depth charges were heard, all well astern. Both destroyers had been observed to turn away from the convoy when the first torpedoes were fired.

Fifth War Patrol

No. C-3

Radio Reception: The 4115 Kcs series was received strength 5 almost every night. 216.1 kcs. was our best frequency in GILBERTS, MARSHALLS and near PIONAPE. Interference on 8230 kcs. by an unknown commercial station was experienced several times on the 1100 schedules.

No. C-4

February 26

0600 (M) Day broke and clear with a smooth sea. A periscope attack on a properly protected valuable unit off the entrance buoys would be difficult on a day like this. Subsequent attacks would be impossible. Close coverage of the three entrances to JALUIT did not look promising.

1216 (L) Having attained position from which we can remain submerged by daylight, dived.

February 27

1551 (L) With 10 feet of periscope out, sighted the white tips of the 140 foot masts

Case 25, No. C-4 (Cont.)

February 28

0000 (L) Pulled out on target's starboard bow, 3000 yards off the track just as the moon came up bearing about 090. Target now in sight. 0018 dived to 35 feet and continued radar ranges and periscope bearings. When range was 6000 yards and angle on bow 30 S went to 55 feet. Used generated ranges and periscope bearings, and came to a 90 S track for bow tubes. Set torpedoes on 10 feet. Sound picked up the escort on 285 relative. 0050 target almost filled field of periscope. Felt we were getting in a little too close, came left 10° to an 80 S track to speed up shooting. At 0052, with generated range of 1500 yards, fired the bow tubes, all gyros on zero, all to hit between the foremast and stack. First torpedo was fired at foremast with periscope angle of 347 and succeeding torpedoes at 7 S firing intervals.....All these torpedoes should have hit, but the last explosion was heard only by sound and the forward room. Three explosions were heard throughout the ship. The screen was close on our port beam; took the ship to 250 feet after the last shot. No depth charges were dropped at this time. Sound reported the tanker's screws could not be heard. In about 15 minutes sound reported motor boats screws. The escort was close. We put him astern and when we thought we were clear made a reload on No. 1 and 2 tubes, circled around, gradually coming up. At 0145 reached periscope depth. Saw tanker dead in water, having turned completely around, headed about 030. He was down by the stern with considerable more overall draft..

ORIGINAL

26 November 1945

Case 25, No. C-4 (Cont.)

of a SHIRETOKO class fleet tanker bearing 043, distance about 16 miles..... He was protected by an air screen and a surface escort. He was zigging radically with an average course near 283. The escort vessel was about 2000 yards on his starboard quarter, not patrolling, just keeping station. The air screen was at about 4000 feet patrolling well up ahead within 50° on either bow. After 1700 the cruiser observation type plane could not be seen in the air. When the range was 6200 yards the C.O. saw what he thought was the plane on board forward. However, no recovery was observed ..... We lost him just before we thought it was time to surface. By this time we knew a lot about him, and felt sure his number was up.

1845 (L)

Surfaced. With the aid of radar and Fairbanks-Morse regained contact at 2030, range 14,300 yards, 5° on our port bow. The night was black with low dark clouds in several directions. A big moon will rise at 2400. Commenced gaining position ahead, passing up tanker's port side, keeping range open to 10,000 yards. When we were broad on target's port quarter a brilliant blue white streak appeared just above the horizon on his exact bearing. We thought we had been detected by escort listening and cleared the bridge, except for O.C.D. and C.O., to await developments. No developments came and the "rocket" is now thought to have been a shooting star. By 2310 battery was fairly well charged and went to full power on four engines. 2314 we were dead ahead of target, range 10,000 yards. Paced target. Target on course 265, not zigging, speed between 9.8 and 10 knots. Waited to get target in moonlight for periscope attack.

ORIGINAL

26 November 1945

Case 25, No. C-4 (Cont.)

- The escort was milling around between us and target. The tanker was signalling to the escort with a large green signal light. The C.O. and the Executive Officer looked him over and decided he needed only one more torpedo. Maneuvered into a position about 1150 yards on port beam of target (filled field in high power).
- 0225 (L) Reached periscope depth 15° on tanker's starboard bow about 2000 yards away. Maneuvered for position on tanker's beam at close range. Escort off tanker's port side was patrolling, stopping, and then going ahead.
- 0235 (L) Sound reported DD propellers and echo ranging. Searched for DD but could not see him. Clouds made visibility spotty. Sound reported DD propellers closing fast. Sound had been too good to doubt them now. Went to deep submergence, expecting barrage from DD. High speed propellers went overhead, but no charges were dropped.....
- 0344 (L) Range 4200; made ready all bow tubes. Set torpedoes on 4, 6, 8 and 10 feet. Thought this would be our last chance at this big fellow, and to make sure he was deleted from H.I.J.M. Navy List we would fire four torpedoes. Kept target bearing exactly 000 relative from here in and stood by to shoot at any time the screen should detect us. We had a quick look at the screen and the tanker about every 6 minutes.
- 0845 (L) Screen ahead again. He turned around and commenced moving out on port bow.
- 0850 (L) Screen bearing 335, still moving to port. As long as he kept going away we kept closing. When the tanker's range was 2600 yards, and the escort bore 315 relative, he started back toward us. Decided now as the time to shoot. Why he made this sashay to port, we will never know, but it was very helpful.

ORIGINAL

26 November 1945

Case 25, No. C-4 (Cont.)

0904 (L) With all torpedo gyros on zero and the periscope dead on zero, and ship swinging slowly; 0904-00 fired #1 at foremast 0904-10 fired #2 just forward of the mainmast, 0904-20 fired #3 just abaft the mainmast, 0904-30 fired #4 at the bridge. Started deep immediately. 0904-40 a very loud premature torpedo explosion.....Two torpedoes unaccounted for. c/c to the right to 050 to parallel tanker. Having heard only one hit, hoped to evade escort by crossing under target's bow to other side, the same as last night. At 0910 a sharp depth charge over the periscope shears caused us to abandon this idea, and c/c to 180 to open target. Ran silent under slow constant helm, keeping escort astern, making good about 180. Two depth charges at 0935 fairly close, one at 0937 and 0938. Eased around to west to drop escort but he let go another charge at 1011 and one at 1012. Gradually eased around to east turning through south and by 1100 he was left astern.

1545 (L) Sighted masts bearing 135T. Took up approach course for possible attack but recognized him as the escort who had been working us over. Reversed course with full rudder. 1615 escort was clear and we came back to north looking for tanker. Hoped escort's presence here meant he no longer had a tanker to escort.

line, 140. From Midway: 11 days; 21½  
hours - 3460 miles.

February 27

0634 (X) (2nd contact) (1st attack). Lat. 7-10 N,  
Long. 134-32 E. 6500 ton freighter -

ORIGINAL

26 November 1945

Case 26. No. C-2 (Cont.)

Missed. Just after submerging off the MALAKAL entrance to PALAU, sighted a dark object. Commenced approach. As it became lighter made the target out to be a freighter similar to KASII MARU (Page 47) without surface escort. The problem was working out fine with 14 knots speed when at a range of 4000 yards she made a large zig away.

0652 (K) Fired 4 bow torpedoes on 110 starboard track, 3000 yard range, using speed spread of one knot, one torpedo to go ahead, one at the N and two aft. Apparently the wakes were seen for, when the torpedoes were about one-third of the way to the target, she turned away and successfully avoided being hit.

0702 (K) Two terrific explosions. Took a look around. Nothing in sight. The target must have had air coverage. The depth charges or bombs dropped on us were by far the most violent we had heretofore heard except that of a ship exploding. It is regretted that these four torpedoes were wasted. Probably they should not have been fired but the commanding officer could not resist firing when the chances of success were reasonable, as he considered that they were.

February 28

1349 (K) Off Malakal Entrance. Sighted small vessel. Started approach. Finally made out to be a large fishing vessel not large enough, however, to torpedo. Secure the approach.

1710 (K) Another fishing vessel sighted

Case 26, No. C-2 (Cont.)

March 1

- 0502 (K) (3rd contact) (no attack) Lat. 6-54 N. Long. 134-12E. Anti-submarine vessel with the lines of a small destroyer; possibly a TIDORI class torpedo boat or submarine chaser. Depth charge attack. Sighted ship believed to be a freighter. Started approach. (one hour before usual time for diving). SJ radar picked it up at 4000 yards, range closing rapidly. It was much smaller than at first thought and coming in fast.
- 0507 (K) Submerged under gunfire of machine guns and one about of 3" calibre. SJ range now 2500 yards. Attempted to see through the periscope in order to deliver torpedo attack. Unsuccessful. Went to deep submergence, rigged for depth charge attack and silent running. Commenced evasive tactics. The depth charge attacks were by no means the worst this vessel has sustained.
- 0648 (K) Evasive tactics had been successful or the enemy vessel had expended her cargo of depth charges. She had not been seen very clearly due to bad visibility and the rapidity with which the action developed but she had the general lines of a small destroyer.

Radio Reception: Reception was excellent throughout the patrol.

No. C-2

February 28

Uneventful. Patrolling between ONON and HALL ISLANDS.

March 1

0200 (K) Commenced night search along the track toward TRUK.  
0500 (K) Abandoned search. Commenced submerged patrol, closing TRUK along the estimated traffic lane.  
1900 (K) Surfaced patrolling north between ONON and HALL ISLAND group.  
1942 (K) Sighted glow of powerful searchlight sweeping the seas beyond the horizon. It is believed that this light is located atop one of the islands in Truk atoll.

March 3

1442 (K) Commenced surface patrol to northwestward along estimated track to Saipan and the Empire.  
1955 (K) Sighted two vessels distant 14,000 yards, abeam to port.  
2000 (K) Reversed course and commenced tracking.  
2046 (K) Identified ships as one 9500 ton passenger-freighter similar to Manila Maru (ONI 208J, page 98) and one flush deck diesel freighter of about 7500 T. Both ships appeared to be zigzagging to eastward.

Case 28, No. C-2 (Cont.)

2055 (K) Radar was unable to obtain contact. Continued tracking using TBT and estimated range and angle on the bow. Decided to attack larger of the two ships first.

2300 (K) Radar obtained intermittent ranges at about 5000 yards. Estimated course 085° T, speed 10 knots.

2325 (K) Came to course for a 90 starboard track using bow tubes.

2333 (K) Checked range with radar.

2337 (K) Using TBT bearings fired a 2° divergent spread of four torpedoes at the larger target. Torpedoes set for a depth of 20 feet. The first set to run ahead, the center two to hit, and the fourth to run astern. Range 2000 yards.

2339 (K) Observed two torpedoes hit the larger freighter one beneath the bridge and one aft. The second vessel swung away and disappeared behind the target. Closed to attack second freighter.

2343 (K) Second vessel reappeared abeam to starboard, closing us rapidly, angle on the bow 10° starboard. He sent a rapid signal similar to "Zero Negat Queen" in the direction of the torpedoed ship and opened fire on us with two guns of about 5" calibre and several machine guns similar to 20 mm using tracer. Swung away to dodge shots dropping two hundred yards on starboard quarter and astern. His ranging was good but he apparently underestimated our speed. Decided this vessel might have been an auxiliary cruiser in view of volume and accuracy of his gunfire and his smart tactics. While retiring observed first vessel burning amidships. Visibility decreasing due to rain squalls. Decided to circle to northward and eastward and close to attack from the north northeast.
